

Digital Media Lab DVD Instructions

PC users:

Insert disc, play DVD

To access the Resources folder, open the DVD drive, right click and select Open

Open the Resources folder and select the file for viewing

Mac users:

Insert disc, play DVD

To access the Resources folder, double click on the DML icon on your desktop

Open the Resources folder and select the file for viewing

- PC and Mac users will require QuickTime Player 7 to view the DML components
- For optimum playback performance it is recommended you save all the DML files to your hard drive
- Further instructions are available in the 'read me first' file contained in the DML resources
- For further queries about this product, please contact Karen Hildebrandt, Publishing Editor, at karen.hildebrandt@oup.com
