

Practise, master, assess

Suggested Product Implementation Guide

We recognise that for schools to get the most out of their programs, it's crucial to touch base with classroom teachers after they have started using a product. Below is a simple *Maths Plus Suggested Implementation Guide* to help you visualise how *Maths Plus* can be quickly and easily implemented in your classrooms.

Activity	Duration/ Delivery	Timing	Staff Input	Support Options
Familiarisation – introduction to <i>Maths Plus</i> , and its components and their key features	30 minutes as part of a staff meeting or professional learning team meeting	Prior to implementation	Agreement on which program elements to try out before full implementation	Run by School Leader or Oxford Educational Consultant
Planning & programming – incorporating <i>Maths Plus</i> into teaching and learning programs	30 minutes as part of a staff meeting or professional learning team meeting	Prior to implementation	Staff to take part in the training	Run by School Leader or Oxford Educational Consultant or Oxford Professional Support Consultant 
Implementation review – follow up to see how staff are going with the program	Ongoing review – 30 minutes as part of a staff meeting or professional learning team meeting	1–2 months after implementation	Feedback on the successes and challenges of the program	Run by School Leader or Oxford Educational Consultant or Oxford Professional Support Consultant 
Assessment review – follow up to look at student data from the program	1–1.5 hours as part of a staff meeting or team meeting	3–6 months after implementation	Analysis of student achievement and suggestion of areas for improvement	Run by School Leader or Oxford Professional Support Consultant 

Oxford School Improvement Support and implementation sessions

Our **Oxford Professional Support Consultants** offer accredited in-school training to support the effective implementation of all Oxford products.

Our consultants offer sessions to schools to help transform teaching, embed best practice and achieve the best educational outcomes. We can build a professional development program that best meets the needs of your school. Module sessions include:

- Planning and Programming
- Implementation review
- Assessment review
